LETTER OF UNDERSTANDING #1

BETWEEN:

SULZER PUMPS (CANADA) INC.

AND:

**INTERNATIONAL ASSOCIATION OF MACHINISTS
AEROSPACE WORKERS, VANCOUVER LODGE #692**

RE: BANKING OF OVERTIME

Objective: The banking of overtime hours has several advantages to both the employee and the Company. The foremost of which is to give more flexibility to both parties. Presumably, employees will find overtime more acceptable if they can take time off at a later date. Thus, the Company will be able to schedule work loads during peak periods more effectively and be able to give the employee periods of time off during slower periods.

- 1) In Bargaining Units where it is mutually agreed that overtime may be banked, employees shall state on their time card when overtime is to be banked for each full segment of overtime. An employee may bank overtime equivalent to eighty (80) hours straight time maximum and an employee can bank back to eighty (80) hours when they use all or any portion of their banked overtime. All overtime worked thereafter shall be paid at the appropriate rate to said employee.
- 2) Banked overtime will be accrued at the rate earned at the time of banking and will be paid out accordingly.
- 3) Banked overtime pay may be withdrawn by an employee in whole or in part. In the event an employee also wishes equivalent time off, such time will be by mutual agreement and subject to the operating needs and service requirements of the business.
- 4) Working for a second employer during banked time off shall be construed as moonlighting and subject to disciplinary action.

As workload in the fitting classification has increased due to the production requirements the parties agree to add the former position of Production Fitter as a classification to the bargaining unit of Sulzer Pumps Canada, Burnaby.

If it is understood the duties and tasks performed in previous collective agreements by the Production Fitter will be performed by the newly introduced classification of Production Fitter.

The job description for the Production Fitter shall be as follows:

“A Production Fitter is one who is qualified to assemble piping systems, install equipment and pumps for the purpose of running performance tests. This person may also assist a Journeyman Fitter in the performance of their duties, and perform work in the Specialist Classification. Acceptable examples: cleaning and deburring parts, or assembling wear rings on impellers. It is understood a Production Fitter will not displace a Journeyman Fitter.”
